

Victory Safety Alert 99-08-01

MILITARY VEHICLE MOVEMENT BETWEEN GTA AND VILSECK

A new policy for military vehicle traffic in Grafenwoehr and Vilseck is now in effect. The 409th Base Support Battalion has issued Policy Letter #55 dated 1 July 1999, to reduce military vehicle traffic on roads connecting Vilseck and Grafenwoehr. Policy #55 states that:

1. All military vehicle traffic is prohibited from using B-299 and S-2166 to travel from Grafenwoehr to Vilseck between sunrise and sunset.
2. All military non-tactical and tactical will use the south tank trail that connects gate #4 GTA and gate #2 Rose Barracks during this time frame.
3. Tactical vehicles with blackout drive capabilities will use the tank trail at all times and will observe posted blackout drive conditions.
4. Non-Tactical vehicles without blackout drive will use B-299 and S-2166 between sunset and sunrise.
5. Privately owned and rental vehicles will not use the south tank trail without a pass issued by the BSB Commandeer or GTA Commander. These passes can be obtained at Range Control, Building 3015, Grafenwoehr, phone number 475-6332 or at the BSB S3, Building 305, Vilseck, phone number 476-1530.

This policy will reduce the possibility of our military vehicles coming into contact with civilian traffic and reducing the opportunity for an accident.
